

Academic English for  
middle school, high school  
and beyond.

Proven. Guaranteed.

## What is neoPrep+

neoPrep+ is designed for English language learners who need to succeed in an academic environment. This comprehensive, fully mobile curriculum develops general, school subject and social situation English skills. It also includes a variety of highly interactive reading-based activities and games that reinforce reading skills.

neoPrep+ adapts to the individual needs of every learner and offers the language preparation students need to move from middle school to high school, and from high school to university. neo's online Placement Test allows students to begin studying at their current skill level. Its unique blended learning program combines independent study on the neo™ Study App with in-person or neo™Live coaching that increases fluency and cultivates the learner's ability to communicate in English.

## English learning for all skill levels

neoPrep+ offers 11 skill levels for learners 11 years old and above. Learners can complete as many or as few levels as they need to reach your school's English requirement. Levels start at Pre-A1 for those with no previous knowledge of English and ends with C1-Bridge for those learners who will be in a school program that is conducted entirely in English.

## Why choose neoPrep+?

- **Goals you can measure** neoPrep+ helps students establish clear and measurable English-language learning goals.
- **eTest – Online Placement Test** Assess your students' English skill levels with neo's online, cloud-based adaptive testing platform. nexgen hosts the platform, but you can customize the testing page with your school's logo. You can be up and running in minutes with your own URL, ready to evaluate your classes' eTest results.
- **Academic English** neoPrep+ provides school subject content in core subjects like math, science, history and geography, as well as the everyday language of the classroom and the school environment.
- **Builds Academic Reading Skills** neoPrep+ builds important reading skills that will prove invaluable in middle school and high school, and as your students prepare for university. These skills include reading for main ideas, skimming and scanning, understanding vocabulary in context, using context clues to decipher meaning, rapid word recognition, and decoding.

## Powerful study app

The neo Study App delivers English language learning to young learners in a way that makes sense to them. Powered by DynEd's lessons and certification program, and backed by 30+ years of data from over 25 million learners globally who have successfully learned English with our programs, neoPrep+ guarantees improved English fluency for your students at every certification level.\*

## International English certification

neoPrep+ certificate levels are aligned with the Common European Framework of Reference for Languages (CEFR). In order to move from one CEFR level to the next, learners must successfully complete a series of Mastery Tests within each level. Once learners have mastered all necessary language concepts for their CEFR level, neo will automatically open the appropriate Certification Test. Learners earn a DynEd certificate when all tests are successfully completed. It takes 3.5 months or less to go through each certification level.

## Blended Learning that delivers results

neo's blended learning options are flexible and allow learners to address areas of difficulty as they progress towards their goals. Teachers can prepare class lessons quickly and easily using neoPrep+ Scripts. They can also assign students to work with our trained online coaches for one-on-one sessions. Thanks to neo's advanced AI technology, coaches can specifically address problems that arise in the self-study sessions. neo feeds this information to the coaches before every coaching session, ensuring students attain each level's requirements successfully.

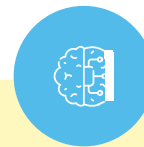

### Student Monitoring

Teachers and Administrators can view learner progress in real time.

### Backed by over 30 years of success

neo provides a comprehensive system with data from 25+ million students from around the world.

### Advanced Technologies

AI and Speech Recognition Technology work together for powerful results.

\*Our price guarantee is based on real certificate outcomes for students earning 6000 points per week and completing an approved number of coaching sessions during a study period of 90 days or less per level. If a student takes longer to complete a level, the price will not change.
